PROJECT WIN

We're excited to announce a new project win at 20 Gresham Street, featuring Alto Cito cubicles, HPL duct panels, and Dekton vanities with Roma fluted fascias. The scope also includes refurbishment to the End of Trip facilities in the basement, installing Octave lockers, Fenix Towel stations and other amenities

PROJECT PROGRESS

Works have resumed at 155 Bishopsgate, where we previously completed several phases four years ago. We're now back on site to complete the washrooms on Levels 8 to 12, marking an exciting new phase of progress on this ongoing project.

PROJECT COMPLETION

We've completed works on Blue Fin Level 6, including Alto HPL cubicles, Corian troughs, and Tego mirrors. We're also in the final stages of completing the End of Trip (EOT) facilities in the basement, including Alto Cito shower cubicles and Octave lockers.

PRODUCT SPOTLIGHT

This month's product spotlight is on the Alto Cito cubicles, featuring an emergency release function for added safety. These cubicles comply with Doc M and T regulations, ensuring safety as priority.
