CELEBRATING 25 YEARS

This March we proudly mark 25 years since Washroom Washroom was established on 14 March 2001. It's a milestone that reflects a quarter century of delivering high quality washroom solutions, innovation, and trusted partnerships across the commercial sector.

WOMAN IN CONSTRUCTION WEEK

Women in Construction Week takes place from 2nd to 8th March 2026, and we are proud to recognise the significant role women play across the construction and washroom sectors. From design and specification through to project delivery, women contribute to the creation of high quality, functional washroom environments. The week serves as an important reminder of the value of diversity within our industry and the continued progress toward a more inclusive built environment.

SPRING WASHROOM REFRESH

With March bringing the start of spring, it's a great time to refresh and upgrade commercial washrooms. Early installations ensure spaces are functional, stylish, and ready to handle increased use over the coming months.

PRODUCT HIGHLIGHT

Alto Bamboo is made from rapidly renewable bamboo, delivering impressive strength stability and natural moisture resistance. A durable sustainable alternative to traditional timber, built for high performance washrooms.
