END OF TRIP WASHROOM X THE SPLASH LAB

We're proud to have partnered with The Splash Lab on the End of Trip facilities at Broadgate Quarter, delivering a premium washroom environment that combines quality, functionality, and thoughtful design. As one of our trusted suppliers, The Splash Lab played a key role in bringing the project to life. We also recently collaborated on a blog exploring the value of well-designed End of Trip spaces and how they can enhance the everyday workplace experience.

PROJECT HIGHLIGHT

Project Highlight of the Month – 20 Triton

This month we're celebrating the completion of 20 Triton, featuring beautifully finished End of Trip facilities and Superloos throughout. The project showcases a sleek all-laminate specification, delivering a durable, modern solution with a clean, contemporary aesthetic. We're proud to have played a part in bringing this impressive workspace to completion.

FUTURE FORWARD

Sustainability continues to shape the way we deliver our projects, and we're currently seeing an increasing number of bamboo products moving through our factory. As a rapidly renewable material, bamboo offers an excellent balance of durability, performance, and environmental benefits, making it a popular choice.

PRODUCT HIGHLIGHT

Durat is a sustainable solid surface material that brings both durability and design flexibility to modern washroom environments. Made with a high recycled content, its seamless finish and wide range of colours make it an ideal choice for bespoke vanity units.
