WORLD GREEN BUILDING WEEK

To honour World Green Building Week, we'll be showcasing a few of our green projects and taking a closer look at the sustainable choices behind the design. From responsible material selection to innovative solutions, the project demonstrates how thoughtful decisions can help create more sustainable, high-performing spaces. It's an opportunity to highlight the work we're doing to support a greener future for the built environment.

PROJECT WINS

We're excited to share two of our latest project wins: Buckley Building in Farringdon and 6 Bevis Marks with LivSt. We're looking forward to getting these projects underway and bringing our washroom expertise to both spaces.

PROJECT HIGHLIGHT

This month, we completed 1 Golden Lane, a large-scale End of Trip project featuring Octave Oak Veneer Lockers, smaller lockers with integrated USB charging, Corian vanity tops and Alto Cito shower cubicle frontage, bringing together practical facilities with a premium finish.

PRODUCT HIGHLIGHT

Our bespoke vanity units are designed to suit the individual requirements of each project, combining practical functionality with a wide choice of materials, finishes and designs to create a washroom space that feels completely considered.
