SUSTAINABILITY

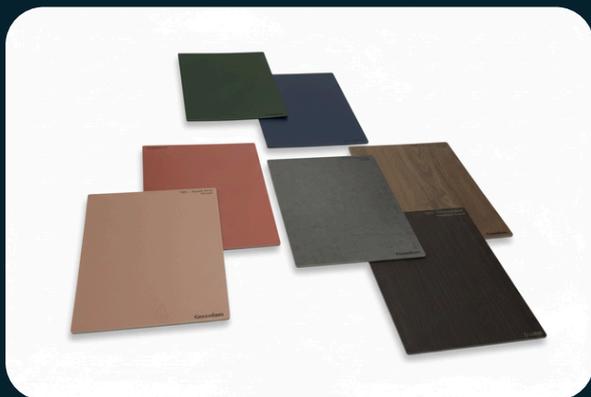

We're committed to sustainable solutions, with bamboo and other eco-friendly materials moving through our factory every day. Durable, renewable, and responsibly sourced, these materials help us create washroom projects that last while reducing environmental impact.

A VALENTINE'S EDIT BY GREENLAM

Designed for long term relationships, this Valentine's edit celebrates privacy, atmosphere and materials that age beautifully. Featuring Blush Pink, Blue Galaxy, Dark Green and Terracotta, paired with Midnight Acacia, Rovere Casto and Madison Stone, it's a grown up approach to washrooms built for real life and designed for years, not seasons.

END OF TRIP HIGHLIGHT

At 20 Gresham Street, we delivered a refined end of trip facility featuring bespoke curved joinery, rich dark veneer finishes, secure lockers, showers and integrated towel stations. The result is a practical, high quality space that supports modern workplace wellbeing.

FINISH HIGHLIGHT

The Shinoki real veneer laminate by Decospan brings rich texture and natural grain to Alto Cito cubicles, creating a premium, durable finish that elevates any washroom space.
