Washroom solutions that meet the demands of education
A dedicated solution for educational washrooms from one of the UK’s leading washroom specialists, ideal for nursery right through to higher education applications. Bringing a smile to the faces of the people who matter.

frutti | Friendly and fun cubicles for nurseries and infant schools

bambino | Safety, supervision and durability for junior school washrooms

mezzo | Stunning cubicle system with aerofoil profile pilasters

intermezzo | Maximum privacy ideal for modern school environments

forté | Ultimate durability for the toughest of environments

arpeggio | The Arpeggio vanity units collection offers a wide choice of options

tempo lockers | Durable and attractive lockers with sizing flexibility

tempo benching | Resilient and elegant changing room benching

case studies | A selection of recently completed projects

literature | Comprehensive literature available to download or request
spotlight on education

For over ten years Washroom Washroom has been at the head of the class in manufacturing and installing leading washrooms across the education sector.

Our wide range of washroom systems, from the fruit-shaped Frutti to the soft curves of the Bambino and sophistication of the Intermezzo are ideal for nursery, junior and higher education applications and are all available in an array of colour choices, materials and finishes including hard wearing and environmentally friendly recycled options.

In addition to a wide range of cubicle options designed to provide privacy, security and where appropriate, supervision for younger children, we also design, manufacture and install a string of complementary products, including vanities, lockers and benching.

Established in 2001, Washroom Washroom has successfully built on its philosophy to design, manufacture and install high quality innovative washroom products, on time and within budget. During this time the company has developed a range of washroom cubicles, vanities, lockers and benching together with a dedicated bespoke joinery service, that meets the changing demands of markets as diverse as leisure, commercial, retail and education.

Washroom Washroom’s leading team of designers pay close attention to the selection and integration of materials and our manufacturing team, operating state-of-the-art CNC machinery, ensure that the construction of the ranges will more than meet the requirements of the client.

Working closely with regulators and environmental groups, we are committed to protecting the environment wherever we operate. We constantly review and monitor our suppliers, products and processes in order to minimise environmental pollution, and waste. In addition to recycling where possible our own waste, we can also manufacture from a range of recycled materials including a colourful range of vanities and panels produced from recycled plastic bottles.
Frutti is a free standing cubicle system offered in solid grade laminate for maximum durability. In place of a headrail the pilasters are supported by a floor mounted bracket for added rigidity.

Using the latest manufacturing technology, the panels can be machined to produce the impression of a range of different fruits. Combined with different colours, and digital or screen print options, it has never been easier to make a fun washroom to encourage regular use.

**specification**

12/13mm Solid Grade Laminate with edges machined to smooth finish.

**fittings and door furniture**

Stainless steel 4” butt hinges, floor mounted stability bracket and satin anodised aluminium full length channels.

**dimensions**

- Height (top of door): 1050mm (900mm panel)
- Height (top of partition): 1200mm
- Height (top of pilaster): 1200mm
- Floor clearance: 150mm (under door only)

*Depth: 1500-1800mm

The heights quoted above are for guidance only. Washrooms designed for younger or older children may require shorter or taller cubicles. Frutti is available to suit your requirements.

**access considerations**

Frutti toilet cubicles are available in configurations to comply with approved Document M.
Bambino is a full sized cubicle with reduced height doors to facilitate supervision and to alleviate any intimidation that a standard cubicle may impose.

Offered in a choice of HPL or SGL, Bambino cubicles combine a front mounted headrail with sweeping curves to the doors, the pilasters are also radiused to soften the visual impact and provide a unique aesthetic.

The removal of right angles can be mirrored in the duct access panelling and vanity underpanel design to culminate in a washroom unlike any other.

specification
12/13mm Solid Grade Laminate with edges machined to smooth finish.

fittings and door furniture
Stainless steel 4" butt hinges, coat hook, pedestal legs with easily operable cast plastic indicator bolt, full length satin anodised aluminium channels and solid grade laminate headrail straps.

dimensions
Height (top of door): to suit
Height (top of partition): 1950mm
Height (top of pilaster): 2075mm
Floor clearance: 150mm
*Depth: 1500-1800mm

The heights quoted above are for guidance only. Washrooms designed for younger or older children may require shorter or taller doors. Bambino is available to suit your requirements.

access considerations
Bambino toilet cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

*Cubicles with a depth ≥ 1500mm subject to material selection and surcharge.
mezzo

Depending on panel material chosen the Mezzo system can be used as toilet and shower cubicles. Changing cubicles are also available complete with complementary benching.

Mezzo cubicles comprise curved aluminium pilasters and headrail with door and division panel options to suit your specific requirements. Typically the cubicle is set out with 150mm floor clearance with the option of down to floor pilasters and divisions where increased privacy is required.

Mezzo is available with a choice of panel including MFC, HPL, solid grade laminate, glass and veneer.

When cubicle requirements dictate that the cubicle centres need to be greater than 850mm we offer a split pilaster detail ‘Mezzo Duet’ as an option which allows a 450mm turning circle within the cubicle.

**specification**

The Mezzo range is available in various material options, to suit any application:
- MRC - dry, light use
- HPL - dry, medium use
- SGL - all uses
- Veneer - high end uses
- Glass - high end use (see page 14 for details)

Please contact us for full specification details covering the Mezzo range.

**fittings and door furniture**

Stainless steel 4” butt hinges, channel cleats and coathook, satin anodised aluminium pedestal legs. All Mezzo cubicles are supplied with an easily operable indicator bolt, type will depend upon cubicle chosen.

**dimensions**

- Height: 1950mm
- Height (overall framework): 2040mm
- Floor clearance: 150mm
- *Depth: 1500-1800mm

Optional floor to ceiling cubicles are also available with minimal floor clearance for increased privacy.

**access considerations**

Mezzo cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

*Cubicles with a depth ≥1500mm subject to material selection and surcharge.*
Intermezzo offers a fully enclosed solution that is suitable for all washrooms and changing rooms requiring high levels of privacy whilst remaining commercially viable.

Manufactured from SGL for unparalleled durability with floor to ceiling aluminium pilasters providing a stylish rigid structure, Intermezzo ticks all the boxes for the modern schools washroom requirements.

Partitions are extended to the floor and the ceiling with overhead panels above the door providing complete visual privacy to the user.

Intermezzo

Maximum privacy ideal for modern school environments

specification
12/13mm Solid Grade Laminate with edges machined to smooth finish.

Pilaster: Satin anodised aluminium aerofoil sections.
Headrail: Satin anodised aluminium aerofoil section (if required).

Fittings and door furniture
Stainless steel 4" butt hinges and coat hook, satin anodised aluminium full length channels and easily operable cast plastic indicator bolt.

Dimensions
Height: up to 2700mm, dependent on material chosen
Height (door panel): up to 2000mm, dependent on material chosen, with over door panel
* Floor clearance: 20mm (door undercut)
Depth: 1500-1800mm

Access considerations
Intermezzo toilet cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

*Depending on materials chosen, cubicles with a depth ≥1500mm subject to material selection and surcharge.
Designed for use within wet and dry areas, Forté is the perfect cubicle for use in schools and any other environment subject to high traffic. As solid grade laminate is totally impervious to water Forté can be used as shower and wet area changing cubicles.

Forté cubicles are manufactured from 12/13mm solid grade laminate (compact), an extremely robust and waterproof material. Combined with a contemporary continuous headrail for excellent lateral stability Forté cubicles offer an affordable and long term solution to your washroom requirements.

**specification**
- 12/13mm Solid Grade Laminate with edges machined to smooth finish.
- Stainless steel 4" butt hinges, channel cleats and coat hook, easily operable cast plastic indicator bolt, ‘D’ shaped satin anodised aluminium headrail and pedestal legs.

**dimensions**
- Height: 1950mm
- Floor clearance: 150mm
- Depth: 1500-1800mm

Optional floor to ceiling cubicles are also available with minimal floor clearance for increased privacy. This may be of particular use within schools and unisex installations where mobile phone cameras pose a privacy issue.

**access considerations**
Forté toilet cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

*Cubicles with a depth ≥1500mm subject to material selection and surcharge.*
The Arpeggio collection offers one of the most comprehensive vanity unit ranges on the market. Choose from a variety of shapes, sizes and materials, including high pressure laminate and solid grade laminate, to create the perfect solution to your requirements.

High pressure laminate (HPL)
Practical and economical surfacing for everyday washrooms. Ideally suited for medium traffic areas such as offices and industrial units. Only top mounted wash hand basins can be used in Arpeggio HPL vanity units.

Solid grade laminate (SGL)
Solid grade laminate (SGL) is extremely durable and water resistant making it perfect for use in schools and other areas subject to high-traffic or prone to vandalism. Due to the true waterproof nature of the material, SGL vanity units can be fitted with undermounted wash hand basins.

colour options
Various colours are available, dependent on material specified. Please ask for details.

edge and profile options
High pressure laminate tops are produced with postformed downstand (apron) with a rolled edge; they can also be postformed at the rear to produce an integral coved upstand facilitating easy cleaning and unsightly degradable mastics. Solid laminate vanity tops are produced from flat sheet material with rebated front edges to minimize the black core of the material.

supports and under panels
Purpose built timber frames and wall hung cantilever* brackets are available for Arpeggio vanity units in complementary materials such as HPL and SGL. Under panels are available in all of the options above to match or contrast with the top.

* Cantilever brackets require a solid wall or adequate support within a dry lined wall to ensure secure fixing.
Tempo lockers
Durable and attractive lockers with sizing flexibility

Tempo lockers are the perfect solution for secure personal storage in high traffic areas such as public leisure centres, swimming pools and schools. The combination of water/vandal resistant SGL carcass and rigid aluminium framework affords exceptional strength and permits total sizing flexibility.

Available in a range of colours, which can be mixed to provide a lighter appearance, Tempo offers a non-porous, easy clean solution for the changing room environment.

lock options
Coin return locks - perfect for public sports this lock is adjustable to facilitate various coinage including Euros and tokens.
Card locks - ideal for member only facilities this provides a cash free alternative. Credit card style membership cards can be adapted to operate these locks.
Digital code locks - no keys to manage, operated by 4 digit code of users choice (with override).
Cam locks - for use with personalised/allocated locker installations such as staff rooms and schools.
Lockers hasp - for use where the user provides their own padlock.

specification
Carcass: 8mm white solid grade laminate
Doors: 12/13mm solid grade laminate with inset number disc
Shelves: 12/13mm white solid grade laminate
Framework: satin anodised aluminium sections
Hinges: satin anodised aluminium sprung hinges

dimensions
Height: 1800mm. Width: 300mm, Depth: 500mm. Plinth: By others.
The above dimensions reflect typical standardised locker sizes. However Tempo lockers are available manufactured to suit your specific requirements.
spotlight on education
Tempo benching comprises corrosion resistant aluminium frames and choice of seating materials to stand the test of time in both wet and dry environments. Many configurations are offered including wall mounted and island styles with integral clothes rails if required.

An aluminium framework/bracket system pre-treated and polyester powder coated to ensure a top quality and durable finish, supports a choice of seating options. All floor-mounted styles are supported on adjustable legs for on site levelling.

**specification**
Supports manufactured from pre treated powder coated aluminium with floor mounted option having adjustable feet. Bench styles include floor mounted to wall, floor mounted island, wall mounted (cantilevered) and full island with high level hookrails.

**seat options**
Type A - single 300mm wide seating plank is manufactured from 12/13mm solid grade laminate.

Type B - single seating plank machined with integral slots for slatted appearance, maintaining much of the strength of a single piece. 300mm wide, manufactured from 12/13mm solid grade laminate.

Type C - comprises three individual hardwood slats 30mm thick x 90mm wide. Finished with two coats of AC lacquer.

**hookrails**
Independent complementary hookrails can be provided in either a single or double pattress arrangement. As with Type B seats, the double version is machined from a solid plank for increased durability and neater fixings. Coat hooks are supplied at approximately 300mm centres.

**dimensions**
Height: 450mm (top of seat)
Width: 300-650mm
Tempo benching is manufactured to suit your specific requirements including the current recommendations of Sport England i.e. 450mm wide x 480mm high.
WASHROOM EDUCATION / CASE STUDY

University of Westminster, London

After previously completing refurbishment work in Westminster’s student union including a striking bar and leisure facility undertaken by Washroom’s specialist joinery division,
the college immediately identified Washroom Washroom to design the specifications and undertake the manufacture and installation of the WC and shower areas of the new building.

Washroom provided a carefully selected choice of bold colours to create a contemporary theme running throughout. A chic look was created which comprised of stylish Mezzo Aqua WC cubicles and Concerto ducting manufactured in hardwearing Black SGL to provide a long lasting option. Arpeggio vanity units sustained the black theme, manufactured from black Granite.
Intermezzo WC cubicles combine with Concerto solid laminate WC ducts and Concerto solid laminate vanity ducts to create a striking and functional washroom environment.
WASHROOM EDUCATION / CASE STUDY

Tidemill Academy

Washroom went back to school with its recent supply of eye-catching specifications for the £21 million development of the new Tidemill Academy in Lewisham, London.
The unique project, which includes a rooftop five-a-side football pitch, saw Washroom Washroom provide age-specific washrooms for pupils and visitors alike. With the schools facilities open to the public, Washroom Washroom utilised cubicles from across its range to create washrooms specific to the end users age, specifying a number of products from its education range.

For younger students, the Bambino was specified to provide a colourful and comfortable space. The Bambino cubicle system is specifically designed for children of junior school age who may not feel comfortable using washroom facilities designed for adults. Solid grade laminate was used to provide a cost effective and durable space which is extremely hardwearing, water resistant and ideal for high traffic areas prone to vandalism.
Washroom also provided a number of products for Tidemill Academy’s Library. With visitors and older students in mind, Washroom provided its stylish and hardwearing Mezzo stainless steel and Forté cubicles. The more ‘grown up’ look and stainless steel finish helps set the washrooms apart from those aimed at younger students and puts the user at ease. The cubicles also help provide the privacy that older end users demand. Concerto WC ducts and Arpeggio vanity units were installed to complement the cubicles and provide both stylish and practical specifications for use by students and visitors.
Visit www.washroom.co.uk to request and download literature on the full range of washroom products.

**Complete washroom solutions**
A single source of inspiration featuring our complete range of products.

**Commercial**
Commerically focused washroom cubicles, lockers, vanities and ducting solutions.

**Secure accommodation**
A total service for the secure sector including design, manufacture and installation.
