

Concerto Duct Panels

Integrated duct panelling systems enable unsightly services to be concealed and yet offer easy access for maintenance. Concerto duct panels can be supplied with or without the pressure treated softwood timber support framing.

The frames are constructed on site with the completed panels fitted to the framework by means of fixing clips, allowing access where required.

- ✓ Available in standard MFC, HPL or SGL finishes
- ✓ High end option available in veneer, glass or Corian
- ✓ Can be offered ready to accept tiled or stone finishes

Specifications

Concerto Duct Panels

Framework
