

Corian Vanity

Solid surface materials lend themselves to being cut, bent and joined to a seamless smooth finish.

Solid surfacing is the generic name given to materials such as Corian which are an advanced blend of pure acrylic polymer, pigments and natural mineral fillers. Hygienic and durable, Arpeggio Corian solid surface vanities offer a natural stone-like appearance - providing a luxury finish which is equally hardwearing and easy to maintain.

- ✓ Hygienic and durable
- ✓ Can be cut to any shape and joined seamlessly
- ✓ Manufactured either as troughs, or with inset individually shaped sinks or countertop ceramic bowl sinks
- ✓ Wide range of colours and finishes, including those designed to resemble natural stone

Specifications
